

CHINESE POLE

TECHNICAL REQUIREMENTS

SET UP

60 MINUTES

TIER-DOWN

30 MINUTES

SHOW

6 MIN. **30** SEC.

With roots in Asia, the Chinese pole is a vertical metal structure, covered in neoprene and strapped into place. One or many acrobats climb up and down, making various static shapes and dynamic acrobatic moves, each one more impressive than the last.

Provided by client:

- Ceiling height of 14 feet (self-standing pole) and 16 feet or more for the other pole
- A clear space of 15 feet in diameter around the apparatus.
- 4 anchorage points (1000 lbs.) on the ground or we will use the self-standing pole
- Sound system (song will be provided on USB key or a CD)
- Lighting (no specific needs)
- A safe dressing room

Provided by Cirque Carpe Diem:

- Between 1 and 4 circus artists / 1 rigger
- Rigging equipment, apparatus
- Music and costume
